## ▲ CABS, DOORS, MODERNIZATION ENTRANCES AND REMODELING

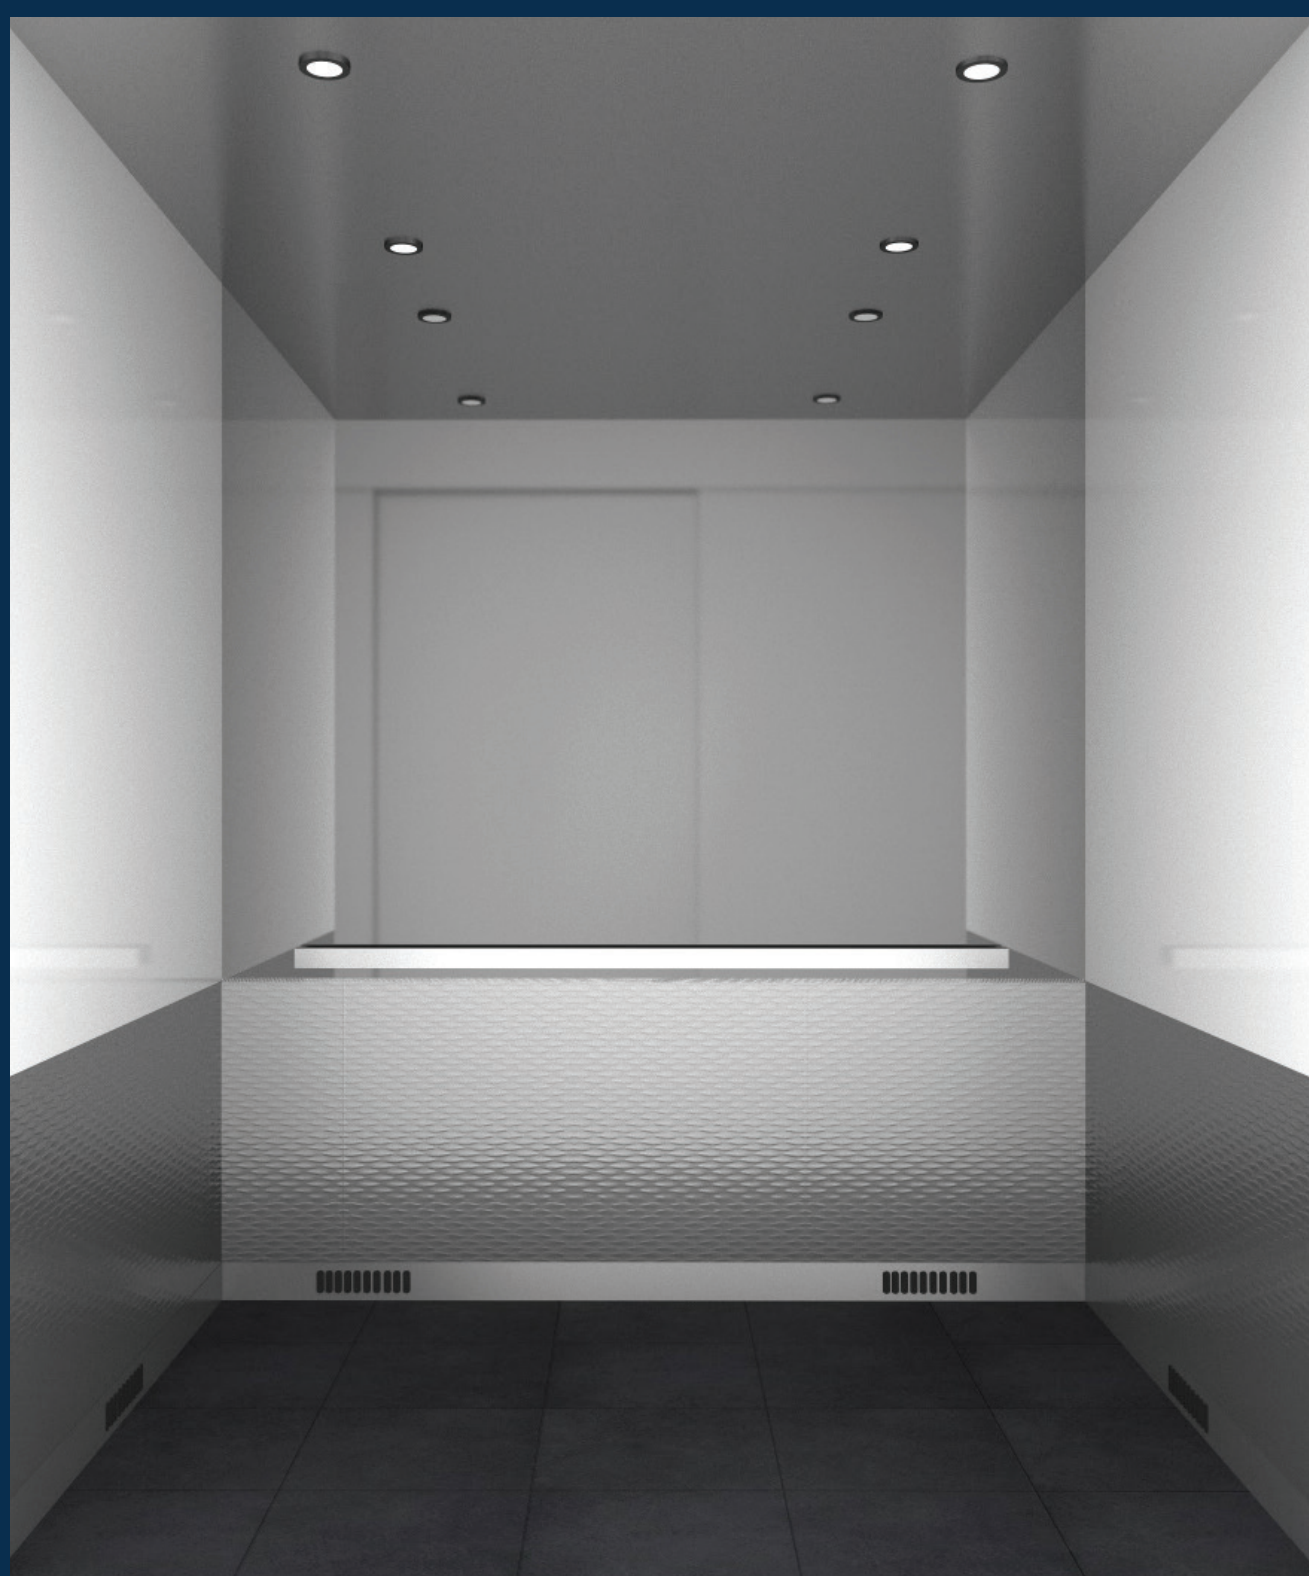

Liftco Elevator Group has a long history of serving the elevator industry. Starting with in the late 1960's, Liftco began installing and maintaining elevators in the New York metropolitan area, we now have second and third generation family members in the elevator business. Liftco, which was incorporated about 12 years ago, has grown steadily and now maintains over 600 elevators on a monthly basis. We complete 40-50 new elevator construction projects every year. We have continued our family reputation for great service, having the most skilled and dedicated mechanics and personnel. We service New York City, Westchester and Rockland Counties, as well and Northern New Jersey.

Liftco have been fortunate to have been chosen by many major real estate firms and institutions to provide both installation of new elevators and ongoing maintenance. We have competed many multi-million dollar elevator projects and look forward to working on yours.
